**Attachments:** Area 40 mailer.pdf

Attached is the updated mailer. Based upon the discussion with Christine on Thursday, it sounds like she wanted to schedule a follow up meeting after their internal team reviewed the mailer. She suggested that since the remedial action is to unrestricted use, perhaps we should eliminate the future use colors from the figure in the mailer and just focus on the remedial activities. What are your thoughts on this? Although the LUP is not specific to the park area, it is to the open space. We would just need to describe that land use covenants would be put in place to prevent access to the open space even after remedy. Although we may receive comments about the park and allowing our children to play on former Superfund property, this is the goal of Superfund. I think we need to address it head on and not avoid the discussion. Our message is that, following remedy, it is going to be safe for everyone, not just for park use, but unrestricted use.
